COVID19 pandemic implications

Challenges

We managed to hold the Kick off meeting literally couple of days before borders got closed

All further meeting are held online

Necessary hardcopy documents sometimes took over a month to be transferred via mail

Universities closed -> officials not available

Financial transactions slowed down

Trainings are essential part of the ALLVET project

It is hard to completely conduct the trainings via Internet

- Particular topics require f2f approach
- There is a time zone gap between partners involved in training
- The budget is not tailored to support online operations

Preparatory workshops are held online

The consortium is staying updated with the information on travel and adapts the activities accordingly
